THICKNESS:

10.5 MM

THERMAL INSULATION:

3.43 TOG

TRANSMITTED NOISE /
IMPACT SOUND REDUCTION: 31 DB

ROLL SIZE:

15.07M2

Circoll Underlay is made totally from recycled virgin carpet offcuts, this sustainable felt underlay offers excellent sound insulation and great compression recovery from heavy furniture.

Our quality underlays help to extend the life of your flooring keeping it looking new for longer. Acting as a shock absorber the underlay will stand up to where and tear as well as providing cushioning underfoot when paired with carpet.

Circoll Sustainable Underlay Range is made in the UK by Anglo Recycling.
